# GLOBAL HIGHTECH TEAMWORK

IHI Hauser Techno Coating is an international high-tech organization, with over 240 employees and branches in Venlo, Yokohama, Shanghai, Barcelona and Olten. At our home base in Venlo, we develop and assemble plasma coating systems with vacuum, sputtering and arc evaporation technology, that find their way around the globe, to customers with notable names. At this medium-sized company, lines are still short and you can make a difference. Hauser was founded in 1983 and became part of the Japanese IHI Group in 2008. The IHI Group is a group of over 200 companies worldwide, totaling over 29,000 employees.

## PROCESS DEVELOPMENT & ENGINEERING MANAGER CROMATIPIC PLANT BARCELONA, SPAIN

Cromatipic is an environmentally friendly technology, setting the new standard in chrome finishing. We offer our Cromatipic technology as part of a turnkey factory including all equipment necessary.

### WHAT CHARACTERIZES THIS JOB?

- Defining and optimizing the process parameters for assuring the requirements in quality, productivity and cost together with required validation and approvals;
- Responsible of process control (**Painting + PVD**), analysing the deviations and implementing actions plans;
- Developing process control tools and it's periodical improvements for each product;
- Following and contributing towards Cromatipic technology's road map R&D goal with it's highest potential;
- Development of paint and its composition to improve quality of Cromatipic technology;
- Developing variation in paint and corresponding process to meet customer requirement for visual as well as functional requirement of Cromatipic technology for current and future used base material;
- Leading the industrialization of new products;
- Responsible of manufacturing new samples for customers;
- Managing the installation and start-up of new production equipment and tools;
- Writing the production methods and production parameters data sheet;
- Participating in the quotation procedure for technical point of view. Analysing of the process and flows, studying and designing the production lines and automatization.

You will report to the Business Manager Cromatipic.

### WHAT DO WE ASK?

- A Bachelor or Master degree in Chemical engineering or similar;
- **Paints formulation** and/or PVD experience in Coatings development, QC and SPC control systems;
- (Additional valuable) Industrial experience in coating advanced planning productions, programmed robots, preventive plant maintenance systems;
- 5 years experience in engineering departments related to components in the automotive industry;
- Experience in companies for decorative plastic parts evaluable;
- Fluent in English (must) and preferably Spanish, French and/or German (optional);

### WHAT DO WE HAVE TO OFFER?

Apart from good primary and secondary conditions, Hauser offers an environment with room for personal development and initiative while working in an enthusiastic and dedicated team of colleagues who strive for quality and innovation.
